Executive Committee
SkillsUSA Maine

Dear Advisors;

I am pleased to be able to send you the attached resume of my SkillsUSA experience. As you look through this you will notice that there are no dates. This is because after 21 years of active involvement in my local chapter, SkillsUSA Maine, and SkillsUSA National Level, the actual dates grow fuzzy.

Our success with building the College side of our organization has been non-existent. We need to look at all the possible ways we can help our students continue their experience in college. This includes not only building our community college chapters, but bring on new chapters from any college or trade school in the state that is willing to be part of our organization. We need to not only have open lines of communication with these institutions, but also with our students attending these institutions. We need to develop and distribute the tools necessary for them to be successful chapters.

Many of you know me and my drive and dedication to this organization. If you would like to hear more about me, I suggest you contact some other people. Below is a short list of people for you to contact for more information. Or contact anyone you know and ask them about my dedication.
